

# Suggested topics

## Suggested topic

- Assessing, monitoring and addressing key drivers of deforestation and degradation and identifying options for reverse/minimize their impacts through regional approaches
- Slash and burn agriculture : identification, assessment and monitoring of slash and burn surfaces and emissions
- *WG3 - How to capitalize on existing forest inventory data and monitoring tools to reach a more efficient carbon emission assessments feeding the MRV system*
- *WG3 - Reporting on forest carbon (integration of forest MRV data on GHG inventory exercises and compliance with international agreements and rules)*
- *WG3 - Efficient design of a multipurpose national forest inventory a discussion on stratification, sampling intensity, plot design, what parameters to include, measurement procedures, tree species identification, data processing*

# Suggested topics

## Suggested topic

- Ground-truthing and accuracy evaluation – **Through other channels than WG (national support, Training and Technology Transfer?)**
- *WG3 - Methods used to estimate carbon stocks, including discussion on possible common approaches within the Guiana shield*
- Measuring levels of forest degradation and carbon stock enhancement
- Community involvement in the establishment of a forest monitoring scheme
- Definitions, methodologies, software, data sources used by the countries within the Guiana Shield to monitor deforestation and reach a deforestation rate (including comparison of definitions for forest, deforestation, forest degradation, forest carbon stocks)

# Dates and location

## Suggested date

- **4<sup>th</sup> WG meeting: end of July (Mon 28<sup>th</sup> & Tues 29<sup>th</sup>) or early in August (4<sup>th</sup> and 5<sup>th</sup>)**
- 5<sup>th</sup> WG meeting :end of September
- 6<sup>th</sup> WG meeting: early November

## Suggested location
