

Install Qgis Wien and R-plugin

- ♣ Install Qgis Wien with "QGIS-OSGeo4W-2.8.1-1-Setup-x86_64.exe"
- ♣ Open Qgis

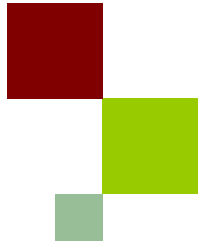

- ♣ Activate R-plugins
 - ♣ tab "processing" -> "options" -> "service providers" -> "Rscripts"
 - ♣ check "activate R"
 - ♣ Select directory folder of R.3.1.3 (eg C:\Programes Files\R\R.3.1.3

- ♣ Open the toolbox including Rplugin: "Processing" -> "toolbox"

- ♣ At the bottom of the toolbox specify "advanced interface" rather than "simple interface"

- ♣ Close Qgis

Install R-plugins for Working Group

- ♣ Copy all provided Rscripts and paste it in the relevant folder: (eg. C:\Users\qgis.2\ processing\rscripts)
- ♣ Open Qgis
- ♣ In the toolbox open tab "R-script" then "landscape pattern"
- ♣ Edit R-plugin named "vectorize patches map and associate metrics" by right click on the R-plugin
- ♣ Copy directory path of OSGeo4W program usually located in:
 - ♣ c:\Program Files\QGIS Wien\OSGeo4W.bat
- ♣ Replace old directory path at line 59 by the copied one
- ♣ Save Rscript and close it
